Multi-Axis
Control

- **Thermal Imager:**
 - Day or night detection of targets at up to 5km
 - Performance not restricted by ITAR (no blurring as associated with US technologies restricted to slow frame rates)
- **Laser Pointer:**
 - Visible designation of objects in water to other search and rescue or security operatives
 - Visible deterrent for engaging hostile craft
- **High Zoom D/N Sensor:**
 - Powerful zoom lens enables long range recognition of targets in very low light conditions

Seenite™ mini Enhanced vision, day or night

Detect, identify, engage and deter

- **Joystick Controller:**
 - Intuitive twist to zoom palm grip joystick
 - Scan modes
 - Position lock
 - Day / night select
